Methodologies: Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Caliber Technologies, Hyderabad

Product Consultant – EPIQ Platform (LearnIQ Module)

Nov 2025 – Present

- **Worked on EPIQ (Enterprise Platform for Integrated Quality) within the LearnIQ module, supporting enterprise clients in the pharmaceutical domain.**
- **Managed 3 client projects (confidential), acting as the primary point of contact for end-users and stakeholders.**

- **Interacted with clients to understand product usage, resolve queries, and provide functional guidance on platform capabilities.**
 - **Identified, analyzed, and prioritized issues reported by users, ensuring quick turnaround for high-priority defects.**
 - **Logged and tracked issues in Azure DevOps (ADO) with detailed investigation notes, replication steps, and impact analysis.**
 - **Collaborated with development teams to ensure timely resolution and communicated updates effectively to stakeholders.**
 - **Conducted product demos, release walkthroughs, and patch update sessions for client's post-deployment.**
 - **Supported basic technical setup, including creating demo environments using IIS and SSMS for testing and client demonstrations.**
 - **Contributed to improving product usability and client satisfaction through proactive issue handling and structured communication.**
-

Inspire Info sol Pvt. Llp., Hyderabad

Business Analyst & Quality Analyst

Jan 2023 – July 2025

- **Acted as a bridge between business stakeholders and technical teams to ensure clarity in requirements.**
 - **Gathered and documented requirements (BRD, FRD, SRS, User Stories) and tracked progress using Jira/Confluence.**
 - **Conducted data validation and analysis using SQL and Excel for airline and enterprise applications.**
 - **Coordinated with developers, QA teams, and stakeholders to ensure timely project delivery.**
 - **Supported UAT execution, defect tracking, and reporting for successful client acceptance.**
 - **Designed workflows, process documentation, and reports for management decision-making.**
-

KEY PROJECTS

Airline Reservation System

- Managed user stories and facilitated Agile ceremonies.
- Conducted UAT for booking, cancellation, and ticket modification workflows.

Airline Loyalty & Discount Platform

- Implemented discount logic and managed backlog grooming.
- Improved user adoption through efficient requirement handling.

Airline Chatbot (NLP/LLM-based)

- Designed conversational flows for booking and customer support.
- Validated chatbot responses and delivered go-live reports.

Career Guidance Platform (EdTech)

- Developed assessment-based dashboards and counsellor workflows.
- Coordinated QA, UAT, and stakeholder presentations.

Test Management Suite (Internal Tool)

- Built sprint-based test case management module.
- Generated execution and coverage reports.

Solar PV Delivery Project (Energy)

- Validated delivery models and created functional test cases.
